

AIR'PRO INTEGRA

P702LFT

A2P3 half-mask with integrated goggles

Benefits

- Stops 99.95% of dust (average diameter of 0.3 microns)
- Compact, lightweight and comfortable
- Unique, patented filter technology: extremely low breathing resistance

Use

- Masks with integrated goggles protecting against impacts, dust and liquid aerosols
- A2 protection against pesticides, paints and solvents
- P3 protection against highly toxic particles

Packaging

- Individual box
- Box of 4 masks

Size	Code
M/L	65 774 658
S/M	65 774 666

Available in several versions:

Model Protection	AIR'PRO Integra with integrated goggles	AIR'PRO	Replacement filters
P3	P702KCM	P702KCF	P702KCG
A2 P3	P702LFT	P702KCI	P702KCG
A B E P3	P70HJ7W	P70C95H	P70YVDY
A B E K1 P3	P702LFS	P702KCK	P702KCL
P3 welding fumes	-	P702LWE	P702LWF

Type of protection	Class*	Example of use
P	3 -high performance	Toxic dusts, mists and fumes (dusts containing chromium, cobalt, lead, cadmium, hardwood, asbestos in low concentrations, silica, granite, ceramic fibres, etc.)
A	1, 2	Organic gases and vapours with a boiling point above 65°C (pesticides, paints and solvents)
B	1	Inorganic gases and vapours (excluding carbon monoxide)
E	1	Sulphur dioxide and acids / acid gases
K	1	Ammonia and organic ammonia derivatives

*The choice of class for the anti-gas filter depends on the expected concentration of pollutants:

- 1: Low capacity (1000 ppm)
- 2: Medium capacity (5000 ppm)

Description

- A2P3 reusable half-mask
- Hugs the face
- Integrated goggles: protects the eyes and prevents fogging
- Air flow diffusion system inside the filter for full use of the activated carbon
- Exceptional breathing comfort:
 - Patented pleated encapsulation technology for a larger filtration surface
 - The HESPA® filter works by mechanical filtration, which is more comfortable than the electrostatic filtration of disposable masks
 - Large, central exhalation valve, highly effective for evacuating CO₂
- Supplied with integrated replaceable filters
- Specific storage bag available (P702KW2)
- Peelable protective films for the integrated goggles, available in packs of 10 (P702KW1)

Materials:

- Mask: FDA-compatible medical grade TPE
Latex- and silicone-free, odourless mask body
Nylon valve, silicone diaphragm
Adjustable 4-point elastic headband with TPE pad for comfort
- Gas filters: Activated carbon filters in an ABS shell
- Particulate filters: Synthetic filter media with TPE insert
- Goggles: Polycarbonate with scratch-resistant anti-fog coating, 120 m/s frontal impact protection

Shelf life: 5 years

Standards

- Half-mask compliant with standard EN 140:1998
- Filters compliant with standard EN 14387:2004 + A1:2008 and EN 143:2021
- Goggles compliant with standards EN 166:2001 and EN 170:2002
